Product Compliance Testing

Interesting and challenging position

Compliance Engineering Pty Ltd provide product compliance testing and inspection services (to manufacturers and importers of electronic equipment), as well as the manufacture and supply of RF shielded enclosures and associated equipment.

Due to growth, a new position has been created within the organisation. The position will involve performing testing of electrical and electronic products against EMC, Safety & Environmental standards, and then preparing technical compliance test reports.

Ideally you will have completed formal studies in electronics (*Advanced Diploma in Electronic Engineering, Electronics Engineering Degree, or trade certificate in electronics*).

The position would suit a candidate who has the following attributes:

- > Sound electronics knowledge
- > Able to use electronic test equipment (DSO, signal generator etc)
- > Computer literate (MS Word & Excel).
- > Good mechanical aptitude
- > A strong focus on detail (standards, reports, procedures etc)
- > Effective communicator with excellent spoken and written English skills
- > Demonstrates initiative
- > Able to work well independently, or as well as part of a small team
- > Holds Australian citizenship and a drivers license
- > Based near Melbourne outer eastern suburbs

Experience in the field of RF and/or EMC would be beneficial, but not necessary as training in this specialised area will be provided.

Remuneration will be based on your level of relevant industry experience (if any).

Your application and covering letter should be submitted to: info@compeng.com.au

Only suitable candidates for interview will be notified.
